

Company Policy

WESTFALIA Metallschlauchtechnik GmbH & Co. KG
Quality Management, Environmental Protection, Safety at Work and
Energy Efficiency

It is a basic target and commitment of Westfalia Metallschlauchtechnik GmbH & Co. KG to deliver 100% product quality to entirely meet customers' requirements, specifications and requested services.

The Quality, Environmental and Energy Management represents an essential part in all processes and production levels including all activities from purchasing, sales, development and production to dispatch. The Managing Board supports the purchase of energy-efficient products and services.

The assurance and optimization of quality, environmental protection, compliance with safety at safety at work and the improvement of energy efficiency means the top priority for each employee at his workplace and in the course of his activities. The Quality, Environmental and Energy management is neither responsible for the product quality nor for the execution of single environmental protection or safety at work guidelines. It is solely responsible for the system quality.

All employees have the right and the duty to insist on the elimination of deficiencies which might endanger the manufacturing of top-quality products, environment, energy efficiency or safety at work. Any opinion, idea and argument can be stated in public and will be evaluated without prejudice. Afterwards, appropriate actions must be taken to correct and improve the deficiencies.

Within the framework of our active Quality, Environmental and Energy Management as well as Safety at Work, the Managing Board evaluates the system on the base of our policy for quality, environment, energy, and safety at work, strategic direction and the objectives set forth therein. Results of this evaluation will lead to necessary corrective actions and are base for the modification of existing or the determination of new company's objectives.

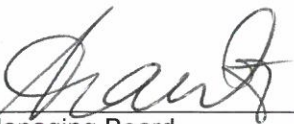

The integrated continuous improvement process ensures the steady optimization of the management system in line with our corporate policy and is one of the essential elements of the management review.

Westfalia Metallschlauchtechnik GmbH & Co. KG commits itself to strictly observe all relevant laws and stipulations on environment, energy and safety at work thus being able to run the company according to the valid guidelines, to avoid environmental pollution and to proactively take preventive measures.
